The Seal Specialist

MAKERS OF  ACUSHNET RUBBER
O-RINGS • CUSTOM ELASTOMER SOLUTIONS

Precix® is an elastomeric designer and manufacturer that delivers sealing solutions. The most trusted name in fuel seals, Precix® o-rings and custom elastomer solutions are found in applications where downtime is the absolute enemy, aggressive chemicals and temperature extremes are the norm and failure is not an option.

O-Rings

Precix® manufactures o-rings to exacting standards with 95% of what we make going through our automated vision inspection/validation systems. We manufacture our own tooling and can tool and PPAP in less than six weeks. O-rings are manufactured to the following standards:

Fuel System Seals

Performing reliably and consistently under extreme conditions, Precix® fuel delivery systems seals deliver vital, value-added performance in these critical Transportation applications.

Upcoming Trade Shows

Design 2 Show - Mid Eastern

Sept 30 - Oct 1, 2009
Fredericksburg, VA
Booth 222

Design 2 Show - New England

November 4-5, 2009
Marlborough, MA
Booth 417

Free Shipping

Gallagher is offering free shipping on new orders over \$500, if shipped by September 30, 2009

Markets Served

Automotive/Transportation

From cars to class 8 trucks, from snowmobiles to aircraft, if it transports people or freight, chances are Precix® has designed, engineered and manufactured many of its vital systems components. Precix®

Brake System Seals

Tight tolerance brake sealing components have been manufactured by Precix® for more than 25 years. Major OEM and aftermarket customers rely on us for a variety of sealing components including Wheel Cylinder Cups, Master Cylinder Seals, ABS Seals, Recuperating Seals and O-ring Seals. Product is manufactured using proprietary flashless molding techniques.

PRECIX

Custom Elastomer Solutions (CES)

Precix® designs and manufactures a diverse set of custom molded products for a variety of markets and industries including Energy (oil patch/natural gas), Food Processing and general industrial applications (grommets, gaskets, miscellaneous shapes). Full in-house material, product and tooling engineering departments integrate with your engineering needs to design the optimal sealing solution. Non-linear finite element analysis (FEA) is often incorporated to test out a concept before going to prototype.

Chemical/Medical/FDA

Precix® sealing solutions are found in applications where aggressive chemicals and temperature extremes are the norm. ARC components provide consistent performance in demanding applications where failure is not an option.

compounds provide dynamic and static seals through a limitless range of pressures and temperatures.

Aerospace/Military/Government

Precix® is a certified AS9100 and AS7115 supplier with ISO/IEC ISO17025:1999 Material Laboratory certification and is a major provider of tight specification components for the demanding environments of both aerospace and defense applications. Major air carriers rely on Precix® components for consistent performance in demanding applications.

Energy Production and Exploration

Precix® sealing solutions are designed and manufactured to enable you to run longer in more aggressive environments for longer periods of time. Precix® offers compounds to handle explosive decompression (ED), electrostatic charge buildup/dissipation (ESD) as well as high abrasion environments (urethane and HNBR seals and o-rings). Precix® offers many UL listed compounds for applications requiring this approval.

Spot Light:

Gallagher Sales Team

Diana Gaiss

Diana has been with Gallagher for 15 years as an inside sales representative. Prior to joining Gallagher, Diana was in outside sales in the chemical industry. She is married with two girls, one in high school and one in middle school. She volunteers a lot of her time to the girls swim teams. Diana's favorite time of the day is walking Murphy her golden retriever.

Value Added Services

More than a manufacturer of world-class products, Precix® offers a full line of services that enable optimal product and process design through to production. Seamless integration into your business is what Precix® strives for. From challenge to solution the Precix® way.

Dennis Leonard

Dennis has been with Gallagher for 22 years. After college, Dennis started in the warehouse as a Shipping Clerk and then moved to Inside Sales. Later, he was promoted to Outside Sales and is now an Account Manager. Dennis lives in Chester County with Michelle his wife of 15 years.

Dennis's hobbies outside of work include Golf, Skiing, Fishing, Camping, Tennis and Oil Painting.
